Subject: Microsoft Settlement

Dear sirs,

I am writing to ask that any settlement to be made with Microsoft ensure that monopoly of the operating system market is not used in future to extend control over successively greater portions of the computer environment. As I sit now, to perform my job of network administration, I am compelled to use an MS operating system, MS Office applications, MS web browser, MS e-mail client, etc. This company has grown so powerful it may be a threat to national economic stability, subject to their management decisions.

Please keep this in mind, and further remember that previous consent decrees have been easily circumvented if not outright violated by Microsoft. They are more dangerous than they might appear.

Thank you for providing this opportunity to speak.
